

Case Study

Small Pastoral Lease

Smaller stations or out camps don't need as much capacity as a larger station however reliable and affordable power is just as important. WA Solar Supplies are able to offer a range of smaller systems designed for the low to medium power user.

Smaller systems such as the one shown here do not lack the quality or sophistication of their larger cousins.

Upper Top Solar modules on trackers displace the amount of diesel fuel used.

Above The inverter, control equipment and batteries professionally and neatly installed.

Left Diesel generator, used either as a backup, power peak loads or an integral part of the power mix.
