

Case Study

Pastoral Lease

Stations use considerable amounts of power for multiple buildings, cool rooms, air conditioning and reticulation pumps.

In this instance, a three phase installation was selected to meet the stations requirements as the majority of the loads present were three phase.

Right The power conversion center, solar regulators and change over switch

Below The solar array following the sun

Bottom Right Battery bank in a well ventilated room

Insert Dual generators. One site is primary and automatic, the older set was used for manual backup or servicing of main set
